AMENDMENTS TO THE CLAIMS

1. (previously presented) An information input-output device comprising:

a service provision unit which has a database relating to services that can be provided to a <u>user of the device</u> ~~subscriber~~, and <u>provides an output job code for a service to be provided to the user</u> ~~verifies whether a person trying to access the database is a subscriber who can be provided with the variety of services~~; and

an input-output control unit which receives data from said service provision unit<u>, and the output job code,</u> and outputs ~~the~~ data <u>associated with the output job code,</u> ~~said input-output control unit inputting an authentication code identifying the person, the code being input from a portable terminal or a keyboard operated by the person,~~ wherein

data in the database is read out through operation from said input-output control unit; and

said service provision unit determining <u>the output job code for the user</u> ~~from the input authentication code whether the person is a subscriber, and when the person is authenticated by said service provision unit as a subscriber~~ who can be provided with the service, said input-output control unit receives the data<u>, the output job code,</u> and then outputs the data <u>associated with the output job code.</u>

claims 2-36 (canceled)

37. (new) An input-output control method comprising the steps of:

receiving data corresponding to a data output process requested by a user;

receiving an output job code corresponding to the data output process; and

outputting the data associated with the output job code.

38. (new) A computer readable storage medium containing a computer readable code for operating a computer to perform an input-output control method, said input-output control method comprising the steps of:

receiving data corresponding to a data output process requested by a user;

receiving an output job code corresponding to the data output process; and

outputting the data associated with the output job code.
